

Semiconductor Mastery Training Programme

CERTIFICATE IN IC TEST SOLUTION DEVELOPMENT

We are in search of motivated talents eager to become an integral part of ensuring chip quality and maximizing production efficiency.

Fully Funded

Course fully funded by the Government.

Monthly training allowance

RM2,500 Monthly.

Job placements

Opportunity to work with SMD, Melexis, or XFAB.*

Duration: **6 Months**

Starting: **September 2024**

Method: **In-Person Classroom**

Location: **Kuching, Sarawak**

Sponsored by

Facilitated by

In Partnership with

*Upon successful passing of technical & behavioral assessment.

You will learn

- IC testing principles, techniques & equipment operation.
- Develop & implement test programme & methodologies.
- Problem solving methodologies.
- Statistical & data analyses.

Eligibility

- Open to Malaysians.
- Aged 21 - 35 years old.

Entry Requirements

- Bachelor's Degree in Electrical and Electronics Engineering, Computer Engineering, Computer Science, Math or related fields.
- Programming knowledge in languages like C or C++

Added advantages

- Knowledge in bench testing, debugging or usage of lab equipment such as oscilloscope, multimeter & signal generator.
